

# ECARF

## – Seal for allergy-friendly products

Certified by European Center of Allergy Research Foundation

- Product fully certified to the needs of allergy sufferers by an independent advisory panel of leading scientists and technicians – **making an allergic reaction very unlikely**
- Product certified to **drive significant reduction of airborne pollutants:**  
>90% of all particles  $\geq 0,5 \mu\text{m}$  i.e. bacteria and fine dust  
>95% for all particles  $\geq 3 \mu\text{m}$  i.e. pollen and mold spores
- Product certified to **release <7 ppb of ozone i.e. ionizer technology that is safe for indoor use**
- Exhaust air from the product certified to have a **neutral odor** (VDA 270)
- Exhaust **air from the product certified to have same temperature as ambient temperature** (difference of  $< 0.3^\circ \text{C}$ )

### 1. Scientific

The seal is characterized by strict scientific test criteria.

### 2. Recommended

Independent consumer portals such as Label Online rate the ECARF seal as particularly recommendable.

### 3. Unique

Organic and environmental seals do not replace the “allergy-friendly” certificate, since natural substances can also trigger allergies.

### 4. Proven

Large brand manufacturers such as Henkel, Philips, L'Oréal and Daimler rely on the ECARF seal.

### 5. International

The seal is used in more than 30 countries worldwide.
